Panasonic Kitchen Cabinets with the Highest Safety Standard F☆☆☆☆ by JIS from Japan
Low Level of Formaldehyde Emission. Safe and Reliable.

F☆☆☆☆☆ Testing:
As the Japan Industrial Standards (JIS) is the Japan Industrial Standards Committee (JISC). The sets of 4 grades of Formaldehyde emission value: F☆☆☆☆, F☆☆☆, F☆☆, F☆. The more star it gets, the lower level of Formaldehyde. It is accepted worldwide.

About Formaldehyde:
Formaldehyde is classified as group one carcinogen by the World Health Organization. It has no color and with strong smell. Formaldehyde is commonly used in construction materials and home appliances such as building materials, paints, interior decorations etc. It may cause health problems to skin, mucosa, respiratory system etc. and raise the risk of cancer with long term inhalation.
